

## **For immediate hire: Intermediate to Senior Level Fisheries / Aquatic Biologist**

**Coldstream Ecology Ltd. is a local, owner operated company, established in 2012, that focuses on fisheries and aquatic biology and restoration projects. Our goal is to continue our success by growing our valued team of biologists, field crew and technical staff, as well as expanding and diversifying our scope of work.**

**Location: Lillooet, BC is only 240km from Vancouver! It has amazing history; a vast diversity of ecosystems and some of the most spectacular scenery the Province. "The greatest Salmon spawning river in the world" where the Fraser and Bridge Rivers meet. Both the weather and the cost of living are among the best in the Province, "One of Canada's best kept secrets!"**

Using community based approaches, our mission is to help lead the local and global transition from an extractive economy to a natural economy, where the benefits we receive from nature are integrated into decisions regarding land and water use planning and policy implementation. We serve local communities, First Nations, farms, large and small businesses, BC Hydro, universities and government. We specialize in combining traditional ecological knowledge with western science to maximize the benefits of the work that we do.

Coldstream Ecology Ltd. is looking for an Intermediate to Senior Fisheries/Aquatic Scientist with Project Management experience to join our small and growing environmental consulting firm. This position is a seasonal full time position (July 15 – Feb 15), with the likelihood of extension to full time.

### **Job Description:**

- Planning and leading field and office based fisheries/aquatic research projects
- Project Management
- Manage project tasks including: work, deliverables, scheduling within associated budgets.
- Preparing and editing technical reports; compiling and analyzing datasets
- Managing field crews of biologists and technicians

### **Education, Experience, and Certifications Required:**

- An MSc or PhD in aquatic ecology/biology or a related discipline, plus five or more years of relevant experience
- Or a BSc in a related discipline, plus ten or more years of relevant experience
- Previous work with indigenous groups, or the desire to work along side First Nation partners is essential
- Environmental consulting and government experience would be a definite asset
- Registered, or eligible for immediate or near term registration, as a Professional Biologist (RPBio or PBIo)
- Experience conducting fish and fish habitat research, monitoring and restoration based projects
- Experience writing technical and scientific documents and reports
- Experience in project management and design
- Knowledge of federal and provincial legislation relating to the aquatic environment and experience liaising with regulators, First Nations, and other key stakeholders
- Level 1 First Aid, Swiftwater Rescue Technician (SRT 1), Electrofishing, and a current Driver's License

**Coldstream Ecology Ltd. offers competitive Salary and Benefits. We encourage you to submit your application by Friday, May 24<sup>th</sup> to [admin@coldstreamecology.com](mailto:admin@coldstreamecology.com). It's not too late to live and work in this amazing ecological paradise!**
