

SENIOR MARINE WATER QUALITY SCIENTIST
Science Practices Department
Office Location: Open

WHO IS ECOFISH LOOKING FOR?

We are looking for a dedicated and hard-working Senior Marine Water Quality Scientist to join our dynamic team! We will provide an opportunity to join a team of experienced and skilled professionals who thrive on innovation, collaboration, and integrity. While working alongside Ecofish experts in your field, we will support your career goals by providing great opportunities for growth and advancement through mentorship, training, and other professional development opportunities.

WHY ECOFISH?

The environment needs our help, and we are up to the challenge. At Ecofish, we have made the environment our life's work, as reflected by our mission: Creating and implementing innovative environmental designs and practices to create solutions that assist and support industry and government, deliver green, sustainable developments.

To achieve our mission, our team is the embodiment of our values:

- **Science based:** We characterize, hypothesize, predict and test – to be accurate and assure quality.
- **Ethical:** We consistently meet or surpass environmental laws, regulations, and guidelines to minimize impacts on the environment.
- **Ingenuity:** We develop novel techniques to increase accuracy in assessing environmental impacts and create innovative solutions for our clients.
- **Professional:** We are competent, honest, ethical, reliable, and certified by accredited bodies.

Ecofish incorporates these values in all aspects of our work. Social responsibility is at the core of our mission. Internally and externally, we bring a strong willingness to be cooperative and supportive of our clients, employees, and suppliers.

WONDERING WHAT YOU'LL BE RESPONSIBLE FOR?

Your role will require you to bring a high standard of scientific excellence to your daily work. These responsibilities will include:

- Leading the design, planning, and execution of ecological studies focused on the marine environment, but also other aquatic resources.
- Providing subject matter expertise to studies evaluating marine water and sediment quality and their linkages to marine ecosystems.
- Evaluating potential changes to marine water quality from in-water or on land activities based on knowledge of water chemistry, sediment transport, and other physical and chemical mechanisms.
- Summarizing and analyzing data to draw conclusions on environmental conditions and making defensible conclusions about predictions about potential effects of anticipated natural and anthropogenic influences.
- Communicating program and study results to clients, Indigenous groups, regulators and stakeholders, through written report, formal presentations, and conversation.

THE QUALIFICATIONS AND SKILLS WE ARE LOOKING FOR.

- M.Sc. or Ph.D. in marine science, oceanography, earth and ocean science, or other related discipline.
- R.P.Bio., or relevant professional designation, or eligible.
- 5+ years of technical experience, consulting experience is an asset.
- Excellent technical writing and analytical skills, and ability to produce high quality reports and proposals.
- Strong attention to detail and a commitment to quality, excellence, and ethics.

Applications will be accepted until this role is filled. Only those applicants that are selected for an interview will be contacted. No phone calls please.
