

Intermediate Aquatic Biologist

Grande Prairie, AB

Down to Earth Biology

EDI is an employee owned company that has been in business for 25 years with offices across western and northern Canada. EDI provides science-based environmental consulting services and products to all major industrial sectors, First Nations, and government. Why is EDI right for you?

- EDI's core focus is Aquatic and Terrestrial biology.
- We believe that one of our greatest successes is our unique company structure, one which has fostered a terrific team environment and a very high level of employee retention.
- We operate on the core principles of quality and innovation, open communication, mutual respect, and safe work environment.
- EDI is committed to the long-term development of our people, we provide a professional development budget and an annual field gear allowance.

Our biologists are responsible for a diverse array of projects, working with their science-based team and developing client targeted business opportunities. If you have an Aquatic Biology background, Environmental Sciences, or a related field, with a proven track record of delivering effective results, you could be the person we are looking for.

As a member of our team, you will be responsible for project design/coordination, field data collection, report writing and communication with clients. Our ideal candidate has in-depth experience in aquatic biology in western Canada, with strengths in fisheries science, environmental assessment and the regulatory environment.

Our ideal candidate has:

- B.Sc. or M.Sc. degree in fisheries management, biology or related science program.
- Registration or eligibility for registration as a P.Biol., or R.P.Bio.
- A minimum of 5 years' experience related to aquatic biology, including crew lead experience.
- Experience in environmental assessments, environmental monitoring, and development and implementation of mitigation measures.
- Experience in various sectors, including upstream oil & gas, pipelines, transportation, mining, renewable energy and/or urban development.
- A proven record of professional report writing and proposal preparation.
- Project management and client liaison experience.
- A working knowledge of provincial and federal regulatory requirements and processes.
- Strong organizational skills and time management skills.
- Work well independently and in a team-oriented environment.
- Willingness to support other discipline field programs, as needed.
- Interest in providing mentorship and junior staff support/supervision.
- Be comfortable with field work in remote locations and/or travel between offices.
- Class 5 driver's licence.

If you are ready for new challenges and a rewarding career experience, please email your resume in confidence by April 22, 2019 to: employment@edynamics.com with **GP0421** in the subject line.

Applicants will be considered as their resumes are received and may be requested for an interview prior to the closing date. Only candidates requested for personal interviews will be contacted. Should an individual with the required qualifications not be available, applicants with closely related qualifications may be considered. As a result, the position may be reclassified and offered without reposting.
