

Intermediate Biologist - Prince George, BC

THE OPPORTUNITY

Triton Environmental Consultants Ltd. ("Triton") is seeking enthusiastic, dynamic Intermediate Biologists to join a well-established team of environmental professionals in our Prince George office. Our existing projects encompass Western Canada and will provide the successful candidate with exciting and rewarding opportunities for career development.

Triton is an employee-owned environmental consulting firm with 30 years of experience responding to the environmental needs of resource developers across all sectors, as well as all levels of government. Our clients look to us to provide a wide range of scientific, technical, and management expertise that merge to provide practical environmental solutions. Triton's offices are geographically situated to provide effective service delivery within Western Canada. Our multi-disciplinary team comprises environmental professionals specializing in aquatic and terrestrial biology, soil science, vegetation ecology, environmental assessment, environmental auditing, environmental monitoring/inspection, and resource management.

Triton will provide you with a challenging and supportive working environment and a management team dedicated to promoting your personal and professional growth. We offer a competitive wage and benefits package.

THE ROLE

The successful candidate will be responsible for delivering the technical components of environmental projects and providing technical support to project managers. Responsibilities will include a variety of tasks, such as:

- Leading and supervising field teams in various disciplines (wildlife assessments, fisheries inventories, fish salvage, water quality monitoring, environmental monitoring/inspection)
- Conducting environmental monitoring and inspection during construction activities
- Implementing and reviewing erosion and sediment control measures
- Recording data and observations in an accurate and well-organized manner
- Preparing technical reports detailing environmental assessments and monitoring activities
- Preparing regulatory approval, permit, and licence applications
- Providing assistance with cost estimates and proposals
- Liaising with clients, regulators, and contractors
- Providing technical leadership within a team environment
- Supervising and mentoring junior staff
- Working collaboratively within Triton corporate culture

SKILLS & QUALIFICATIONS

Ideal candidates will possess the following skills, traits, and qualifications:

- B.Sc. in biology or related field
- R.P. Bio. or eligible for registration as a registered professional biologist with the College of Applied Biology
- Four to eight years of relevant experience
- Sound knowledge of field techniques and regulatory standards necessary for conducting surveys in a variety of service sectors (i.e., water quality, fisheries inventories and salvage, wildlife assessments, environmental monitoring/inspection)
- Demonstrated field experience leading environmental teams
- Good working knowledge of federal and provincial environmental legislation
- Effective technical writing skills, including reporting and document review
- Adept in the operation and maintenance of required field equipment
- Proven ability to work independently for long days in the field
- Excellent communications skills
- Valid Class 5 driver's license

ASSETS

Although not required, the following would be considered assets for this position:

- Experience operating boats, including jet-drive
- Experience scoping and budgeting projects

HOW TO APPLY

If this opportunity sounds like you, and you are serious about joining a progressive team of environmental consultants, please apply with a resume and cover letter.
