

Down to Earth Biology

EDI is an employee owned company that has been in business for 25 years with offices across western and northern Canada. EDI provides science-based environmental consulting services and products to all major industrial sectors, First Nations, and government. Why is EDI right for you?

- EDI's core focus is Aquatic and Terrestrial biology.
- We believe that one of our greatest successes is our unique company structure, one which has fostered a terrific team environment and a very high level of employee retention.
- We operate on the core principles of quality and innovation, open communication, mutual respect, and safe work environment.
- EDI is committed to the long-term development of our people, we provide a professional development budget and an annual field gear allowance.

Our scientists are responsible for a diverse array of projects, working with their science-based team and developing client targeted business opportunities. If you have an Ecologist background with experience in Vegetation, Environmental Sciences, or a related field, with a proven track record of delivering effective results, you could be the person we are looking for.

Our ideal candidate has:

- A minimum of 5 years' experience as a vegetation ecologist, including extensive crew lead experience.
- A B.Sc. or M.Sc. degree in plant ecology, biology, or a related biological/environmental sciences program.
- Registration or eligibility for registration as a R.P.Bio., P.Biol., or P.Ag.
- Qualifies as an authenticating Wetland Practitioner in Alberta.
- Exceptional plant identification skills, ideally for wetland and upland communities in grassland, parkland and boreal landscapes.
- Project management and client liaison experience.
- Experience in environmental assessments and development of mitigation and compensation measures.
- Experience with oil and gas, pipeline, power, renewable energy, transportation and/or land development projects.
- A working knowledge of regulatory processes in Alberta and Saskatchewan.
- A proven record of professional report writing.
- Strong organizational, interpersonal and time management skills.
- Class 5 driver's licence.

Intermediate Vegetation Ecologist

Down to Earth Biology

Responsibilities will primarily be related to technical experience, and may include:

- Vegetation surveys (with experience in completing vegetation inventories, listed plant species surveys, and weed surveys).
- Wetland surveys (with experience in using Steward and Kantrud wetland classification and the Alberta Wetland Classification System).
- Environmental permit applications and agency liaison.
- Environmental planning and management, monitoring of project construction, and participation in various projects led by others involving field studies and data collection.
- Technical report writing including environmental screening, permit applications, environmental management plans, environmental assessments and as-built monitoring reports
- Travel for fieldwork in remote locations and between EDI's offices.

If you are ready for new challenges and a rewarding career experience, please email your resume to: employment@edynamics.com with SK0412 in the subject line by April 12, 2019. Applications will be considered as soon as they are received.
