

Intermediate Environmental Scientist

Surrey, BC

ENKON ENVIRONMENTAL LIMITED

ENKON Environmental Ltd. has an immediate opening for a full-time permanent position as an **Intermediate Environmental Scientist** to join our team in our Surrey office. We are expanding our team to respond to growth and new opportunities. ENKON provides a dynamic and positive work environment which supports innovation and creativity. We offer flexible work hours, a competitive salary and benefits package, and provide allowances to work remotely, bank flex time, and actively support professional development opportunities.

Ideal candidates will have a university degree in Biology, Environmental Science, Geography, Environmental Restoration, Forestry, or related degree or a technical environmental diploma with a combination of work experience relevant to aquatic or fisheries biology.

Position:

You will work independently and as part of multidisciplinary project teams on a variety of projects for both industry, and government clientele. The majority of your work will be in the lower mainland region.

The successful applicant will be technically proficient in the development and execution of field studies in support of aquatic and riparian ecosystem management. You will demonstrate a working knowledge and proficiency in watershed level dynamics. You will be a flexible and adaptable individual who brings and results focused, solutions-oriented approach to multi-disciplinary projects. The successful applicant will possess good communication and interpersonal skills.

The work will involve mapping and classifications of sensitive habitats, design of environmental monitoring programs, fish and riparian habitat evaluation, GIS mapping and analysis, support of compensation/offsetting and restoration plans, regulatory permitting and notifications, fish distribution assessments, fish and amphibian salvage operations, and construction phase monitoring.

As an intermediate specialist you will be responsible for the successful completion of project and foster healthy industry client and industry relationships through the demonstration of the inherent integrity and professionalism that is key to ENKON's identity.

Required Qualifications:

- An undergraduate science degree related to Aquatic Biology, Ecology, or Environmental Sciences and 5 years of applicable work experience; or a relevant graduate degree and 2 years of applicable work experience, or a technical diploma with relevant work experience will be considered.
- Registered as R.P.Bio, P.Ag, or RPF or eligible for registration within 6 months.
- A working knowledge in the application of relevant Provincial and Federal environmental and natural resource legislation, policies, and professional standards.
- Experience with local lower mainland region municipal government bylaws and policies pertinent to land development and environmental protection.
- Experience in watercourse assessment and classification, wetland evaluation, and riparian area assessments.

- Demonstrate excellent oral presentation skills with clear, concise written communication skills (in English).
- Comfortable and willing to work in challenging terrain, adverse weather conditions, carry heavy field equipment, and work in active construction sites.
- Experience with the identification and management of invasive species
- Must have a driver's license and vehicle for transport to field locations.

Preferred Qualifications:

- Certification in electro-fishing.
- Experience in the deployment and operation of automated water quality and hydrometric instrumentation.
- Experience with development of successful riparian restoration planting plans
- Experienced with GPS field data collection (Trimble platforms) and GIS mapping and analysis (ESRI software)
- ISA Certified Arborist designation or hazard tree assessment certification (TRAQ) will be considered an asset.
- Possessing an Industrial Vegetation Management & Noxious Weed Pesticide Applicator Certificate will be considered an asset.

Wage: Commensurate with experience.

Closing Date: 5 pm, September 18, 2019
