

When it comes to environmental consulting, we're helping our clients protect our world's natural resources. As an Intermediate Aquatic Biologist, you will provide technical leadership and support on the aquatic biology and water resource permitting components of our challenging natural resource projects, as well as coordination and guidance to our team of biologists.

Based throughout western Canada, this position will be either field or remote office based. You'll have the chance to work as part of multi-disciplinary project teams to contribute to the environmental planning and permitting and efforts of government and privately-owned infrastructure projects as providing technical support for the duration of construction of those projects. On projects, you will have the opportunity to support the execution of the work including data collection efforts, as well as assist with the development of methodology, technical reports, and regulatory applications. This is a science-based role, and the successful candidate will have a strong reputation in the industry as a technical expert, and a proven ability to defend the technical rigor of the work completed. Bring your enthusiasm for learning and desire to conserve our natural resources, and we'll help you grow!

Here's What You'll Need:

- B.Sc. or M.Sc degree in fish or aquatic-related studies with a minimum of 5 years of directly relevant experience conducting and managing aquatic studies (such as fish and fish habitat assessment and water quality monitoring);
- Previous experience conducting aquatics field work, leading and/or managing aquatic crews in remote settings;
- Excellent technical writing skills and experience providing technical review and edits as required;
- Relevant oil and gas and regulatory experience;
- Hold or be eligible for Professional Designation under the BC College of Applied Biology and/or the Alberta Society of Professional Biologists;
- Must have driver's license and clean driver's abstract

Ideally, You'll Also Have:

- Previous consulting experience;
- Experience working with a diverse range of industrial clients;
- Working knowledge of the Federal Fisheries Act and other relevant provincial and federal environmental legislation in western Canada;
- Strong time management skills, with the ability to simultaneously work on multiple tasks/projects and meet project deadlines;
- Experience in client liaison and business development; and
- Positive attitude, self-motivated with strong initiative.
