

POSITION: JUNIOR TO INTERMEDIATE ENVIRONMENTAL SCIENTIST / BIOLOGIST**LOCATION:** Fort St. John, BC Office

ROY NORTHERN LAND AND ENVIRONMENTAL is an expanding progressive surface land and environmental consulting firm with a special interest in oil and gas, forestry, mining, energy, and agricultural industries, as well as municipal authorities throughout Alberta, British Columbia and Canada's north. We employ a team of over 80 staff members located in our Fairview, Calgary, Fort St. John, and Terrace offices, and we offer interdisciplinary expertise to develop environmental solutions for our clients throughout western Canada. For over 30 years, we have directly assisted clients in regulatory application, and have provided consulting expertise on environmental legislation, regulations/guideline compliance related to project planning, development and reclamation.

GENERAL QUALIFICATIONS

- High School Diploma or Graduate of a recognized Post Secondary institution or college in the field of Biology, Ecology, or Environmental Sciences
- Professional designation (i.e., R.P.Bio. or P.Ag.) or eligible to apply a plus
- Proficient computer skills with Microsoft Office
- Valid Class 5 Driver's License
- Canadian Citizen or Permanent Residency
- Current Safety Tickets a plus

REQUIRED COMPETENCIES

- Ability to coordinate or assist with coordinating project planning, logistics, and preparation for field work
- Understanding of applicable environmental regulations, guidelines and associated industry practices within BC
- Strong commitment to health and safety
- Excellent attention to detail, well organized, and reliable
- A team player!
- Ability to manage time and priorities effectively
- Ability to maintain accurate and up to date field information
- Ownership attitude and accountability for completing tasks on time and on budget
- Resourcefulness, constantly troubleshooting, knows the tools available and uses them appropriately
- Strong communication skills, can effectively communicate with clients, peers, suppliers and contractors

RESPONSIBILITIES

- Takes direction from and supports intermediate and senior staff to achieve project and business goals
- Contributes to projects with focus on data collection/processing, increasing role in analysis/interpretation
- Interface with staff and clients to setup, manage and report on environmental services related to upstream oil and gas facilities and regulatory requirements
- Assist with and/or lead field assessments as required on oil and gas facilities on crown land, including watercourse, wetland, vegetation, soil, timber, and wildlife assessments, including travel
- Complete technical reporting, such as Pre-Construction Site Assessments, Schedule "A" Soil Assessments, Fish Habitat Assessments, Watercourse Classification & Mitigation Reports, Wetland Classification & Mitigation Reports, Wildlife and Wildlife Habitat Features Reports
- Build and maintain positive client relationships focused on providing top quality service
- Undertake assignments that may involve travel and periods of time away from home office. Including baseline field studies, construction compliance monitoring, site reconnaissance, field biological surveys, client meetings, etc.

COMPENSATION

- Full Time Position based in Fort St. John, BC

- Competitive Salary
- Group Life and Health Benefits
- Wellness Program
- RRSP and Employer Contributions
- Compensation packages will be determined based on candidate's experience, education, and overall suitability for position.

Please email applications to humanresources@roynorthern.com. This posting will remain open until a suitable candidate has been selected. We thank all applicants for applying and advise that only those candidates selected for interviews will be contacted.
