Junior Environmental Professionals

Job Title	Junior Environmental Professionals – <i>Casual(Project Specific) with potential to be full time</i>
Department	Environmental Department
Reports to	Environmental Manager
Job Summary	We are seeking an enthusiastic, junior level environmental professional to join our small but growing team. This work entails undertaking field work and activities related to land use and resource development. Our environmental team works closely with First Nation field technicians who have logged hundreds of hours of environmental monitoring on a diverse array of projects for an equally diverse range of clientele. We also work closely with technical experts on project design and implementation. We have a reputation for providing professional and timely services for both small- and large-scale projects.
Requirements	<ul style="list-style-type: none"> • a diploma or degree in Environmental Science, Environmental Planning, Environmental Engineering, or other related degree supplemented by courses in biology and ecology. • experience preferably in a resource or environmental management planning setting. • eligible for registration with the College of Applied Biology of BC or already registered as a Professional Biologist (R.P.Bio.) or Biologist in training (BIT). • Experience in environmental monitoring of marine and upland construction projects is an asset. • knowledge of standard research methods (biology) and techniques and current trends and developments in environmental land development. • knowledge of the relevant legislation, policies, regulations, bylaws, and objectives governing environmental land use in BC (e.g., Riparian Areas Protection Regulations) and, • the ability to apply this knowledge in your day-to-day work through the preparation of reports and recommendations on environmental aspects of land use and development projects, programs, and policies. • Valid BC driver’s license.
Core Competencies	<ul style="list-style-type: none"> • Strong data organization and technical report writing skills. • Strong analytical and problem-solving skills. • Strong communication and interpersonal skills. • Ability to manage time with multiple tasks and priorities. • Ability to work outside in various weather and terrain conditions. • Proficiency with computer programs for managing and communicating environmental data. • Ability to work in a team environment.
Duties and Responsibilities	<ul style="list-style-type: none"> • reviewing and responding to requests for proposals related to proposed land use development applications, • regarding successful bids: coordinating and expediting the processing and approval of permit applications to and through various regulatory agencies (federal, provincial and municipal), • preparing detailed, project-specific environmental management plans, • undertaking field monitoring of projects to assess proponent compliance with environmental protection plans and relevant permits, • overseeing the preparation of regular (daily or weekly) monitoring reports; and, • conducting field sampling (water quality, fish and wildlife habitat assessment, presence/absence) and habitat restoration work.
<p><i>Applicants should be in British Columbia and must be eligible to work legally within Canada. Salary commensurate with education, skills, and experience. Proof of COVID-19 Vaccination is required.</i></p> <p style="text-align: center;"><i>Only candidates selected for interviews will be contacted.</i></p>
