## Job Posting

### Senior Biologist – Campbell River, BC

Mainstream Biological Consulting needs a Biologist. Not just any Biologist, but one that thrives on rain-soaked field days, wrestling blackberry and Devil's club, chaotic work schedules and occasional weeks parked at a microscope for hours on end. If this sounds like your ideal working environment, come join our diverse team of Environmental Professionals and live on beautiful Vancouver Island!

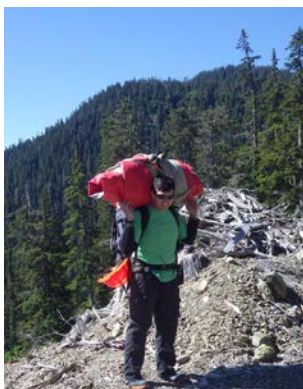

We are a locally owned company with strong ties to our community and are excited to work where we live. The position requires the successful applicant to be based out of Campbell River, BC which is a desirable place to live according to the crazy housing market right now. But with rivers, lakes, ocean and mountains all at your doorstep, why wouldn't you want to live here?

We require an intermediate to senior level candidate for a permanent full-time position immediately. The ideal applicant will bring with them a broad skill set based in environmental consulting experience in coastal BC, with a focus on wildlife and terrestrial assessment. And because this is northern Vancouver Island, if there is some fish assessment experience on your

resume that would be also great.

#### Responsibilities in this position include:

- Conducting biological and environmental assessments in terrestrial and aquatic environments.
- Managing field data and preparing technical reports.
- Preparing permit applications
- Providing regulatory guidance for a broad range of development projects
- Acting as a Senior Environmental Monitor providing expertise to guide wildlife protection and salvage activities for construction projects.
- Mentoring junior staff and preparing project proposals

Candidates must be physically fit, able to work independently or as part of a team, be available for work at night and / or on weekends and be comfortable working outdoors in all weather conditions. Short term camp work may be required but you will spend lots of nights in your own bed. The ability to be flexible with scheduling at short notice is an asset (well, a necessity if we are being honest).

1310 Marwalk Crescent, Campbell River, BC. V9W 5X1  
phone: (250) 287-2462 fax: (250) 287-2452

Desired qualifications include:

- Minimum of a Bachelors degree in relevant discipline (biology, ecology, resource management or environmental science), or comparable education and experience
- Minimum five years relevant experience
- Professional designation (RPBio preferred) and personal commitment to professional biological practice
- Valid electroshocking certification
- Valid swiftwater rescue technician training (minimum Level 1)
- First aid with CPR component
- Experiencing with Riparian Areas Protection Regulation assessments, including RAPR training
- Wildlife inventory and handling procedures training
- Experience with data management and report preparation
- Exceptional organization, communication and time management skills
- Experience with QGIS, or other GIS software
- Experience with Office365

To apply:

We encourage individuals who are passionate about their environmental career and enjoy a team orientated working environment to apply. Enthusiastic and self-motivated candidates who can fill the Senior Biologist roll but also have interest in developing opportunities in our company in their areas of expertise should submit a detailed resume listing valid certifications along with relevant experience and skills. Include at least two professional references, the ones that will tell us why we'd be crazy not to hire you. Please provide a hand-written cover letter that includes salary expectations and availability, and an explanation of why you feel you'd be a good fit with our crew.
