College Online Course in Professional Ethics

ALL COLLEGE MEMBERS must conduct their practice in accordance with the College's *Code of Ethics* and uphold the *Principles of Stewardship*. The College's online course in Professional Ethics was developed to improve new and existing members' understanding of the expectations, obligations and responsibilities of being a College member, and to increase member capability and confidence in handling professional situations ethically. The new online course includes information about the College, the make-up of College Council, and includes seven learning modules: 1) competence, 2) independence, 3) integrity and professional regard, 4) due diligence, 5) signing and sealing work, 6) assessing and managing risk, and 7) the principles of stewardship. Each module includes a discussion on the topic and presents scenarios to reinforce understanding

of the topic and how it relates to a member's area of practice. Upon completion of the course, members will be required to pass a short, open-book exam, consisting of 10 questions.

AS OF SEPTEMBER 1st, 2016, all new registered and In-Training applicants are required to complete the course prior to receiving membership in the College. This will provide the new member with a heightened awareness of the College as an organization, its applicable legislation and rules, and an understanding of the College *Code of Ethics* and *Principles of Stewardship*.
