

Feeling like a fish out of water in your current role?

Ready to get your feet wet in a challenging new opportunity?

VAST Resource Solutions is a diverse and growing natural resource consulting company based in Cranbrook, BC, providing services to private and public sector clients throughout BC and Alberta. We are seeking an experienced, field-ready **Intermediate/Senior Fish-Aquatic Biologist** to join our team.

The Fish-Aquatic Biologist will provide science-based and project management leadership to a broad range of fish and aquatic habitat assessment, aquatic ecology, benthic invertebrate, field inventory/survey, stream classification, water quality monitoring, and construction environmental monitoring projects.

This is a permanent full-time position to begin as soon as the ideal candidate is found. Applications will be evaluated as they are received; the posting may close at any time.
