We're pleased to offer this exciting career opportunity as an Environmental Scientist with Yucwmenlucwu (Caretakers of the Land) LLP. Yucwmenlucwu is a growing natural resource management company under the Splatsin Development Corporation which is located in Enderby, BC. We provide a diverse range of environmental, archaeology, and forestry services to our many partners and clients, as well as technical support to the Splatsin Community. Our team is comprised of over 30 professionals and technicians focused on the protection and conservation of cultural and natural resources. This position provides an excellent opportunity for someone wishing to make a positive contribution to the current state of our environment. We offer competitive wages, as well as an attractive employee benefits package. Enderby is a vibrant, thriving community and our location allows for a quality lifestyle with access to many world-class recreational amenities.

Summary of Duties:

The Environmental Scientist will assist our environment team in the management and delivery of various projects and conservation initiatives, specifically in the fields of environmental impact assessment, environmental permitting and monitoring, aquatic and terrestrial ecology, conservation biology, water quality and quantity, and natural resource management.

Responsibilities:

- Management and delivery of environmental projects, programs, and initiatives
- Provide technical support to the referral and consultation processes
- Mentor and train junior staff and Splatsin community members
- Develop and maintain good relationships with clients and partners
- Develop project proposals, work plans, and budgets
- Prepare technical letters and reports
- Manage contracts and sub-consultants

Requirements:

- Bachelor's Degree in Environmental or Biological Sciences
- Previous experience working with a First Nations community or organization and in private consulting
- Minimum of 5 years of multidisciplinary experience in environmental sciences
- Minimum of 2 years direct project management experience
- Registered (or eligible) Professional (e.g. RP. Bio, P. Ag, P. Geo, EP)
- Knowledge of regulatory processes, guidelines, and best management practices in BC
- Ability to cultivate relationships with community members, colleagues, and partners
- Excellent organization, prioritization and time management skills
- Proven ability to work within project budgets, under contracts and with sub-consultants
- Demonstrated technical writing and research experience
- Strong interpersonal, communication and teamwork skills
- Discretion and respect for confidentiality

To be considered for this position, your resume must clearly demonstrate proficiency in the aforementioned duties, responsibilities and requirements. We would like to thank all applicants for their interest in this position; however, only those considered will be contacted for an interview.
